NEXCELOM BIOSCIENCE ACHIEVES ISO 9001:2008 REGISTRATION

Compliance Reflects Company's Deep Commitment to Quality Management

[Nexcelom Bioscience](#), a leading provider of cell counting and analysis products for biomedical research and the Biopharma industry, announced that it was awarded International Standards Organization (ISO) 9001:2008 registration for its quality management systems.

The ISO registration is based on a quality management system that covers design, manufacturing, and distribution of Nexcelom's Cellometer-branded proprietary cell analysis equipment, consumables and reagents to the academic, scientific and industrial markets.

"Achieving the significant milestone of ISO registration demonstrates our commitment to providing high quality products to our customers. While maintaining our current proven levels of excellence, it is my belief that ISO registration will help us improve over the long term, upholding our customers' expectations that their technology partners maintain the high level of quality they require," says Peter Y. Li, President & CEO of Nexcelom Bioscience.

The ISO registration, the most widely used quality standard in the world, provides Nexcelom the recognition of its quality practice within the industry, thus enhancing the competitive edge of its products around the globe.
